

PATIENT CARE

989 Patients served in 2024

9,920 record setting visits

10 Visits per patient

20% of all visits occurred via Telehealth

99% of BVMI patients were satisfied with the care they received last year.

FISCAL IMPACT

\$580,000+

in estimated savings for Bergen County hospitals and Charity Care.

There were just 13 ER visits for every 100 BVMI patients, compared to the national average of 35 ER visits per 100 uninsured individuals. With just one average ER visit costing \$2,683, this reduction in visits resulted in estimated savings of over \$580,000 for the local Bergen County safety net in 2024.

EXCEPTIONAL OUTCOMES

60%

of BVMI's diabetic patients have controlled A1C levels, compared to the national benchmark of 35%

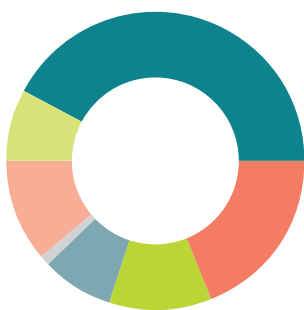

72%

of hypertensive patients have a controlled blood pressure reading, compared to the national benchmark of 61%.

These results led to 3 awards from the American Heart Association.
